uPVC Doorsets & Panels

NWD
New World Developments

Introducing our latest uPVC 40mm doorsets collections, bringing together over 30 years of experience with more choice in design, style and performance.

Discover the all-new Artisan and Velour designs, with chamfered frame, alongside our established Heritage and Vintage ranges.

Four distinctive collections.
One complete range designed for every style of home.

The Artisan Collection

Made for the future of energy efficiency

An NWD uPVC door is designed with modern living in mind, combining advanced energy efficiency, high security, and timeless style. Built with a 40mm constructed core using robust materials, high-performance glazing, and a multi-point locking system, each door is engineered to deliver comfort, peace of mind, and long-term value.

With new energy regulations coming into force from 2027, many doors on the market are already falling behind. This door doesn't just meet future standards, it's designed to exceed them, helping to keep your home warmer, your energy bills lower, and your investment protected for years to come.

This brochure includes our range of uPVC door panels, available in 24mm, 28mm and 40mm thicknesses across the Velour, Heritage and Vintage collections.

Crafted with a focus on proportion, detail and enduring style, the Artisan 40mm doorset collection, with chamfered frame, bridges the gap between contemporary minimalism and traditional character. Elegant mouldings and thoughtfully designed glazing create a timeless entrance, supported by modern engineering for exceptional security and thermal performance.

Tested to industry-leading standards, the Velour finely textured finish boasts a high degree of resilience that resists scratches and repels fingerprints and dirt. It also withstands harmful UV rays, extremes of temperature, and exposure to chemicals and cleaning agents. The result is easy maintenance and effortless elegance.

HERITAGE & VINTAGE COLLECTIONS

As energy requirements change, older or lower-spec doors may no longer meet the standards. Choosing a 40mm doorset that's already built to exceed upcoming requirements means no unexpected upgrades, no compromises, and no stress, just long-lasting performance you can rely on.

RAISE YOUR GLASS

With cutting edge technology combined with 20 highly skilled, artisan glaziers working to create on-trend, bespoke and handcrafted glass designs, we take glass very seriously. And to top it off, our glass designs can be matched to the sidelights and toplights meaning your customer can have the completed look across their door set.

Sidelights and toplights are 36mm triple glazed as standard with the decorative panel on the inside.

Sidelights and toplights are coupled as standard with a choice of 20mm aluminium coupling bar or 20mm thermally broken coupling bar.

Standard midrail height is taken at 900mm, measured from bottom of door to centre of midrail internally

Please note if the panel colour is changed, the colour in the glass design will remain as shown unless otherwise specified on the order form. Every effort has been made to reproduce the colour of our panels and the coloured film in the decorative glass designs. However printing constraints will give rise to some colour deviation.

HERITAGE & VINTAGE COLOUR OPTIONS

Our uPVC Doorsets are available in a wide choice of colours to suit both modern and traditional homes. All finishes, except classic white, feature a subtle grained texture that adds depth and character while maintaining a natural, timeless look.
